

Technical Inspection Assistant

Adaptative controlling process

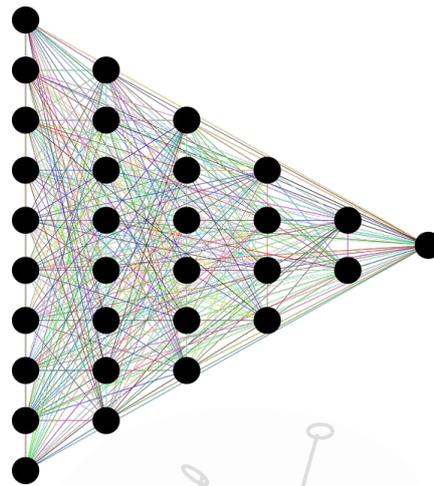

Automatic Report Generator

Norms synchronisation

Multimeters compatibility

Customer Management

Evolutive technology

**CLAUD**

Convolutional AUDit system

## FEATURES

### **Dynamic Inspection Device**

*Tablet with inspection SW*

*Multimeter for isolation & earth reading*

*Circuit breakers infos extractions*

*Electrical circuits analysis versus schematics*

*Provider Electrical box infos*

*extractions & signaling*

*Automatic filling report*

*Background SW synchronisation*

### **Background Computing**

*Norms extraction & automatic process adaptation*

*Evolutive devices databases*

*Convolute Neural Engines*

### **Customer Management Tool**

*Customer Database*

*Frontend Manager*

*Complete Equipments Management*

## BENEFITS

Precise/rigorous inspection process

High Inspection quality

Corporate & Employee

administrative load reduction

Controlling / reporting time reduction

Automatic Norms synchronisation

Human Error reduction

Evidences Management

Focus on agent technical skills
